KINGTON MARKET TUESDAY 7th NOVEMBER 2017 Sale of Store Cattle

McCartneys report a good entry of 130 store cattle at Kington on Tuesday 7th November 2017 for their November sale.

We had an excellent sale of store cattle at Kington with and a good attendance of buyers looking for cattle. The store cattle trade remains firm at present with the prospect of a good fat cattle trade leading up to Christmas and the New Year period, which helps maintain the trade on the older heavier cattle.

We had a good yard of mainly strong cattle. The ages of the cattle ranged from 12 to 27 months and weights from 350kg to 620kg.

All cattle forward sold to an excellent trade with a good following of buyers and more could have been sold at these good prices.

The well-bred and good confirmation cattle sold to premium prices and sold up to £2.40ppk for some 20 month old Limousin x steers Messrs Watkins which made £1180.

The super market spec cattle sold to premium prices with an excellent trade throughout the sale on all sorts.

November Cattle prices were as follows.

All steers averaged an excellent £2.16ppk up to £2.40ppk.

The steers averaged £1058 per head and sold up to £1195 per head for some 20 month old Charolais x steers from Messrs Hammond.

All heifers forward averaged £2.07ppk up to £2.30ppk.

The heifers averaged £1005 per head up to £1235per head for some 18 month old Charolais heifers from B Bayliss & Co

All cattle forward at the sale averaged an excellent £1045 per head.

Farm assurance is very important on store cattle and premiums were also being paid for those cattle which would meet the super market specs when finished.

In our December sale of Store Cattle, Feeding Bulls, Cull Cows and Cows with Calves, which will be held on Tuesday 5th December 2017 at 11.00am with catalogue entries closing on Tuesday 28th November 2017 at 5.00pm.

We expect a good trade and guaranteed support from buyers for this forth coming sale.

Please note all cattle over 42 days of age will need to be pre-movement tested for TB purposes within 60 days prior to their movement.
